

# Activity of disseminating Japanese EWBS technology

*( Emergency Warning Broadcast System )*

*November 2020*

# ISDB-T 20 countries

Those countries which are facing the risk of natural disasters (Peru, Central American countries etc.) have strong interest in EWBS introduction and expect a technical assistance from Japan.

# About DiBEG

<https://www.dibeg.org>

## Purpose

Digital Broadcasting Experts Group (DiBEG) was founded on September 1997 to promote ISDB-T, the Japanese Digital Terrestrial Broadcasting System, in the world. And also, DiBEG promotes the exchange of technical information and international cooperation to facilitate common understanding for ISDB-T in the world.

## Activities

- ◆ Research of the trend toward digital broadcasting in the world.
- ◆ Exchange of digital broadcasting technologies and facilitation of common understanding.
- ◆ Technical assistance for the countries where ISDB-T has been adopted.

## Members (17)

- ACCESS CO., LTD.
- FUJI TELEVISION NETWORK, INC.
- Hitachi Kokusai Electric Inc.
- Japan Broadcasting Corporation (NHK)
- Japan Telecommunications Engineering and Consulting Service (JTEC)
- MASPRO DENKOH CORP.
- NEC Corporation
- NHK Technologies, Inc.
- Nippon Television Network Corporation
- Panasonic Corporation
- Sharp Corporation
- Sony Corporation
- TV TOKYO Corporation
- TOKYO BROADCASTING SYSTEM, INC
- TOSHIBA CORPORATION
- TV Asahi Corporation
- YACHIYO ENGINEERING CO., LTD.

# Authors

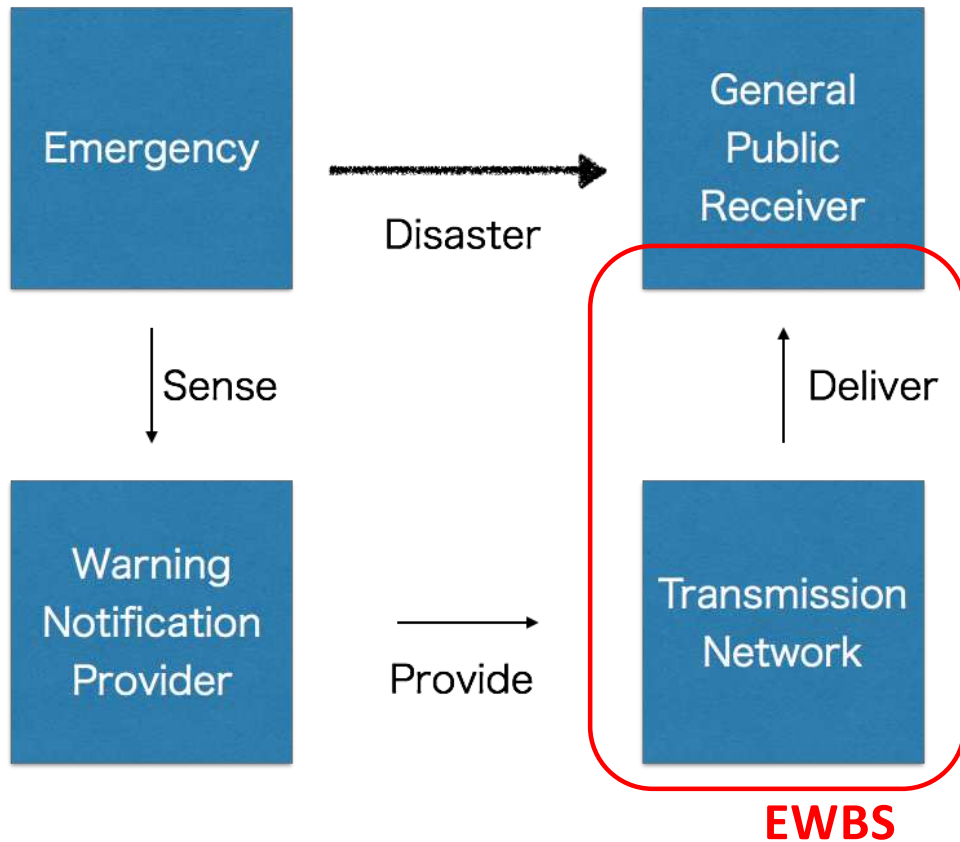

- ◆ *Yasuji SAKAGUCHI* : Director, Broadcasting Systems Engineering, JTEC (Japan Telecommunications Engineering and Consulting Service)
- ◆ *Yasuo TAKAHASHI* : Advisor to DiBEG
- ◆ *Seiji SAKUMA* : Senior Researcher, ISDB-T Promotion Group, ARIB (Association of Radio Industries and Businesses)

# Outline

1. *Advantage of EWBS with ISDB-T*
2. *Technical requirements on EWBS in Latin American countries*
3. *Development of “EWBS Superimpose Dissemination System”*
4. *Current Status of EWBS Implementation in Latin American Countries*

# *EWBS ecosystem & requirements*

- Mass delivery
- Rapidity
- Understandability
- Universality
- Usability
- Reliability

equals to “Advantage of ISDB-T”

## *Why emergency information on broadcast network?*

- *One-way transmission*  
*Traffic Congestion-free, Resistant to cyber security*
- *Robust transmission*
- *More coverage at remote place*

# Broadcast - Robust Transmitting Station

*Telecommunication failed*

*Electricity failed*

*Broadcasting kept transmission !*

*Devastated landslide by torrential rains hit Izu-Oshima, on 16 Oct. 2013*

# Broadcast - more coverage at remote place

*In case of Peru--*

*Populated place*

*Remote place*

Broadcast Network

250 transmitting stations

more than 2,000 relay transmitting stations

*Wide coverage to every corner of the nation*

Cellular Network

*not complete*

# ISDB-T Hierarchical Transmission

## Example

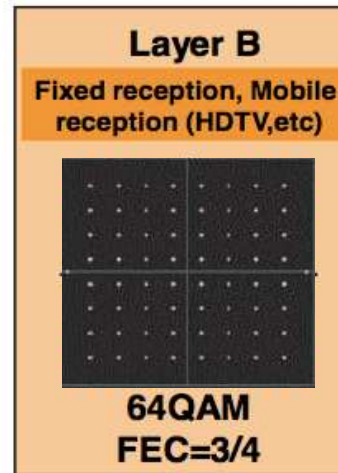

(2 layers transmission)

For handheld service

Robust transmission mode

*One-Seg*

For HDTV or Multi-SDTV service

High capacity transmission mode

*Full-Seg*

# Robust "One-Seg" Transmission

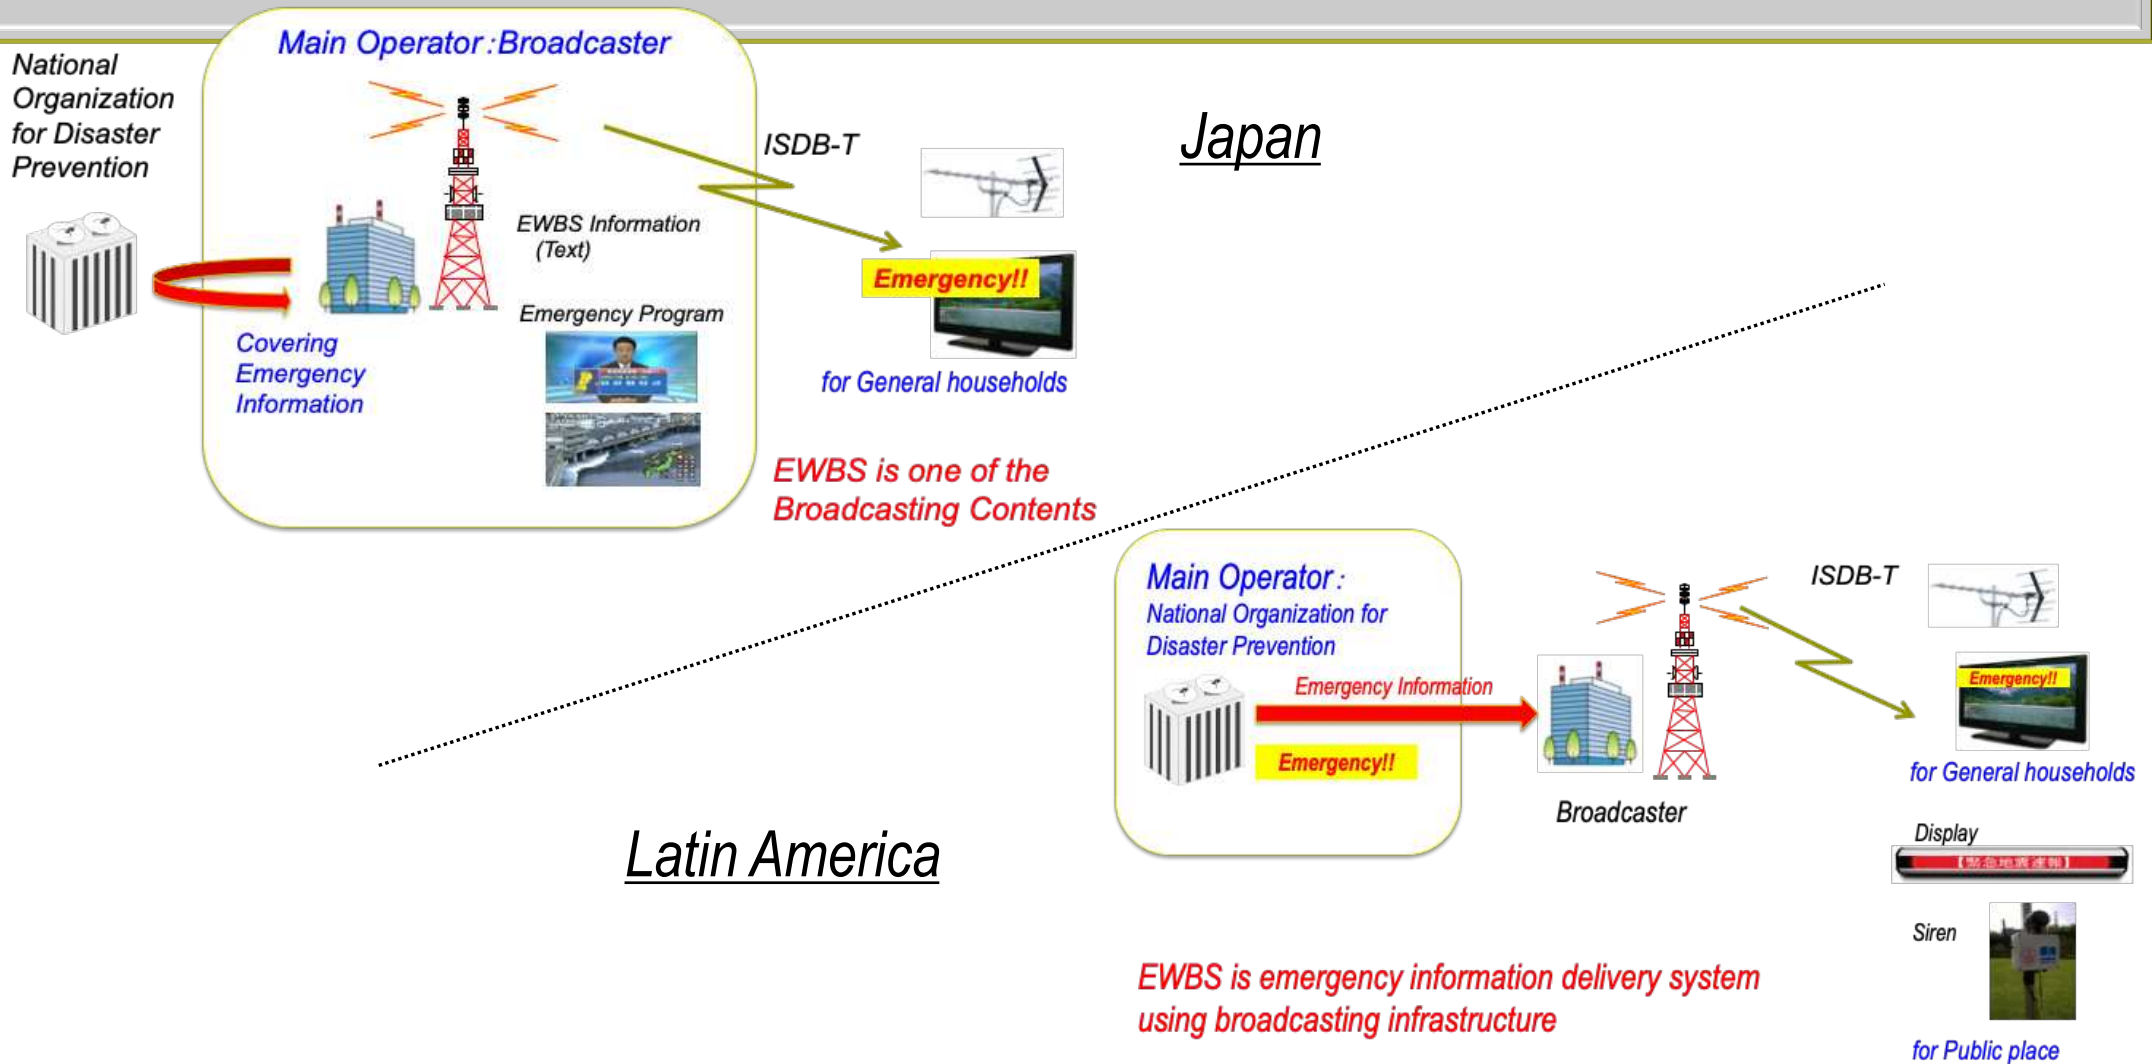

C/N reception condition : "One-Seg" has more than 10dB better than "Full-Seg"

1. *Advantage of EWBS with ISDB-T*
2. *Technical requirements on EWBS in Latin American countries*
3. *Development of “EWBS Superimpose Dissemination System”*
4. *Current Status of EWBS Implementation in Latin American Countries*

## *Differences in requirements on EWBS*

	Japan	Latin America
Main Operator	Broadcasters (all)	Government (National Organization for Disaster Prevention)
Concept of using broadcast radio waves	Means of delivering “broadcasters’ contents”	Means of delivering “national disaster prevention information”
Target Areas	Ⓐ Nationwide Ⓑ Regional areas	Ⓐ Nationwide, Ⓑ Regional areas Ⓒ Local areas
Information disseminated	Ⓐ Early warning	Ⓐ Early warning Ⓑ Information after the occurrence (Post-event information)
Target recipient	TV Viewers in general households	Public places (offices, firefighting stations, hospitals, etc.) and general households
Type of receivers	TV receivers for home use	Various receivers for public / home use <ul style="list-style-type: none"> <li>▪ Public signage / sirens, etc.</li> <li>▪ TV receivers for home use</li> </ul>

# Difference in EWBS Operation between Japan and Latin America

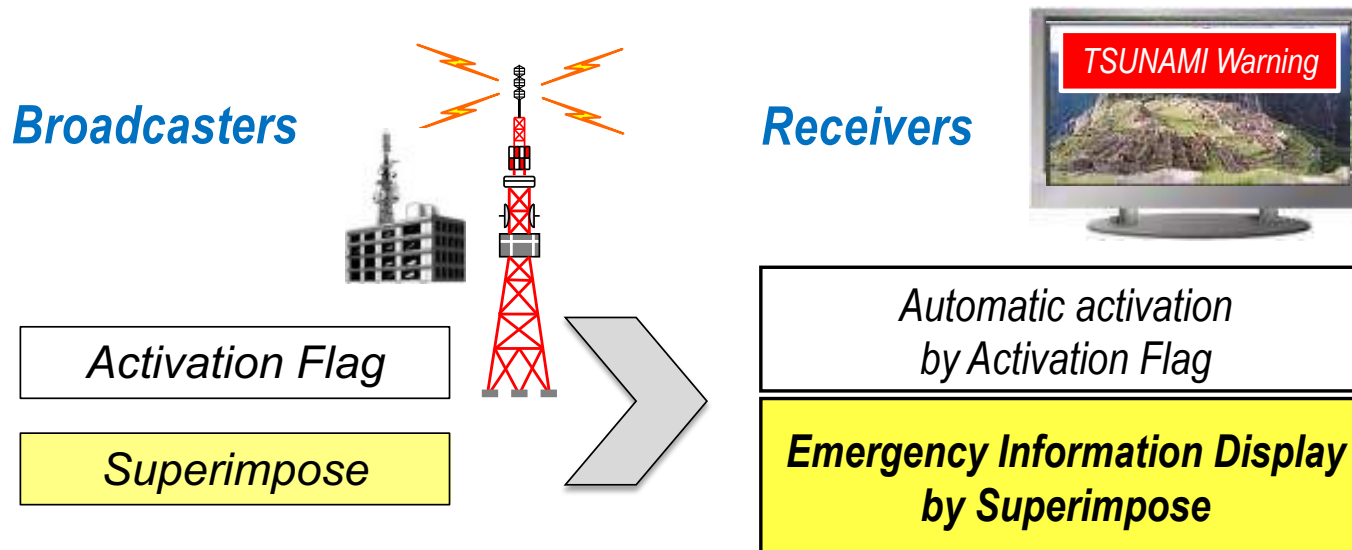

## *Requirement of EWBS local operation*

*At a TV Transmitting Station in Peruvian Andes. This is a district where 20,000 people died of drowning by devastating glaciers flooding caused by the 1970 earthquake.*

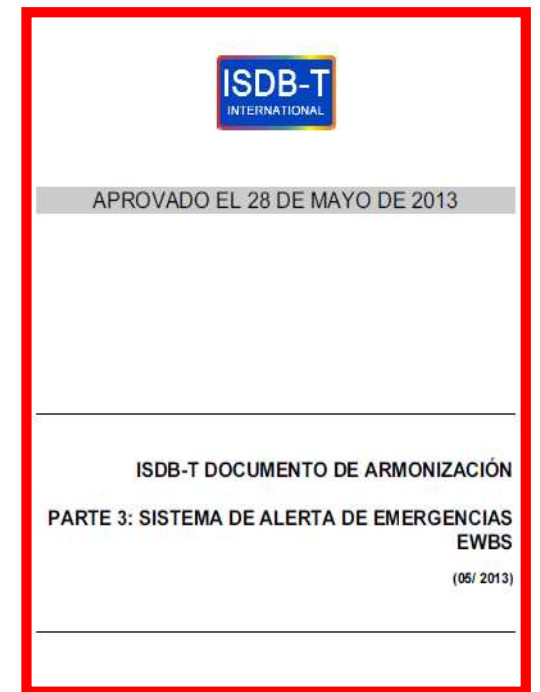

*In the future, digitization and EWBS operation will contribute to the Local specific disaster prevention.*

# EWBS Standardization in ISDB-T International Forum

**Adding a “Superimpose” function on the Japanese original, EWBS Standard was approved by ISDB-T International Forum in May 2013**

**EWBS Harmonization Document**  
By ISDB-T International Forum

# EWBS Standardization in ISDB-T International Forum

	ARIB / Japan	Harmonization Document (EWBS)
EWBS	<p>Standard STD-B31 (TMCC) STD-B10 (PMT)</p> <p>Operational Guideline TR-B14</p>	Superimpose is used for emergency information delivery in EWBS operation.
Superimpose	<p>Standard STD-B24</p> <p>Operational Guideline TR-B14</p>	

# What is “Superimpose” ?

## 3 Types of text messages used in TV service

### (1) Normal Subtitle (Open Caption)

- Information which belongs to the main program
- Always on *the display*

### (2) Closed Caption

- the service for inaudible persons / multilingual movie etc.
- Synchronous information with the main program
- Selection of display (on/off) by viewers

### (3) Superimpose

- Asynchronous information with the main program
- Selection of display (on/off) by viewers
- to be sent background at any time

*Overlay in Broadcasting Studio*

*Overlay in Receivers*

# What is “Superimpose” ?

*Superimpose*  
overlay in receivers

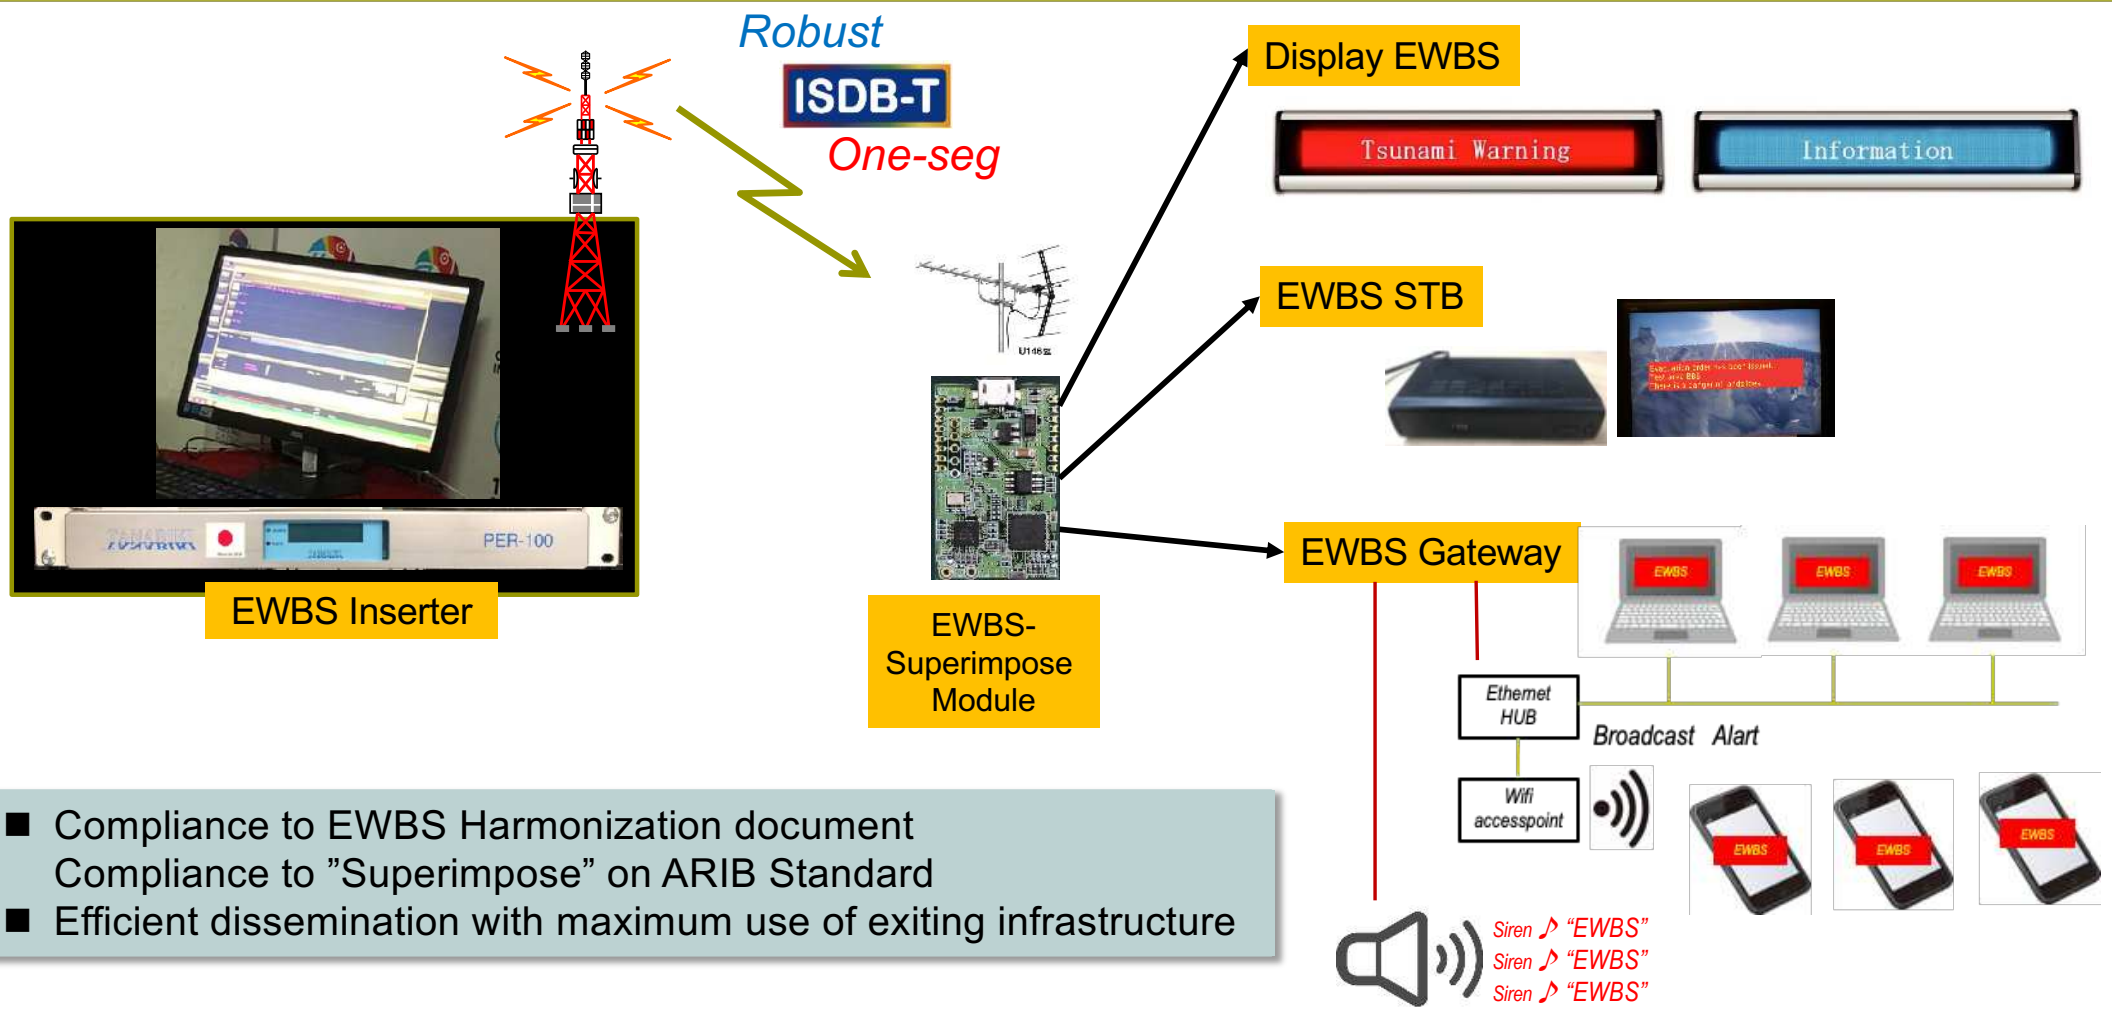

*Open-Caption*

*On 14:46 March 11, 2011 NHK's Broadcasting*

1. *Advantage of EWBS with ISDB-T*
2. *Technical requirements on EWBS in Latin American countries*
3. *Development of “EWBS Superimpose Dissemination System” for Latin American Countries*
4. *Current Status of EWBS Implementation in Latin American Countries*

# EWBS Superimpose Dissemination System for Latin American countries

- Compliance to EWBS Harmonization document
- Compliance to "Superimpose" on ARIB Standard
- Efficient dissemination with maximum use of exiting infrastructure

# Video introduction

- ◆ *EWBS Operation in Arequipa, Peru*
- ◆ *EWBS utilized in the evacuation drill in Lima, Peru at the “World TSUNAMI Awareness day” (5 November 2019 )*
- ◆ *EWBS reception test in Brasilia, Brazil (December 2019 )*
- ◆ *EWBS reception test in San Jose, Costa Rica (March 2019 )*
- ◆ *EWBS demonstration in SET Expo in Sao Paulo, Brazil (August 2019 )*
- ◆ *EWBS & EEW(Earthquake Early Warning) connection test in Lima, Peru (July 2020 )*

# *EWBS Superimpose Dissemination System* for Latin American countries

*Simple installation*  
*Simple operation*

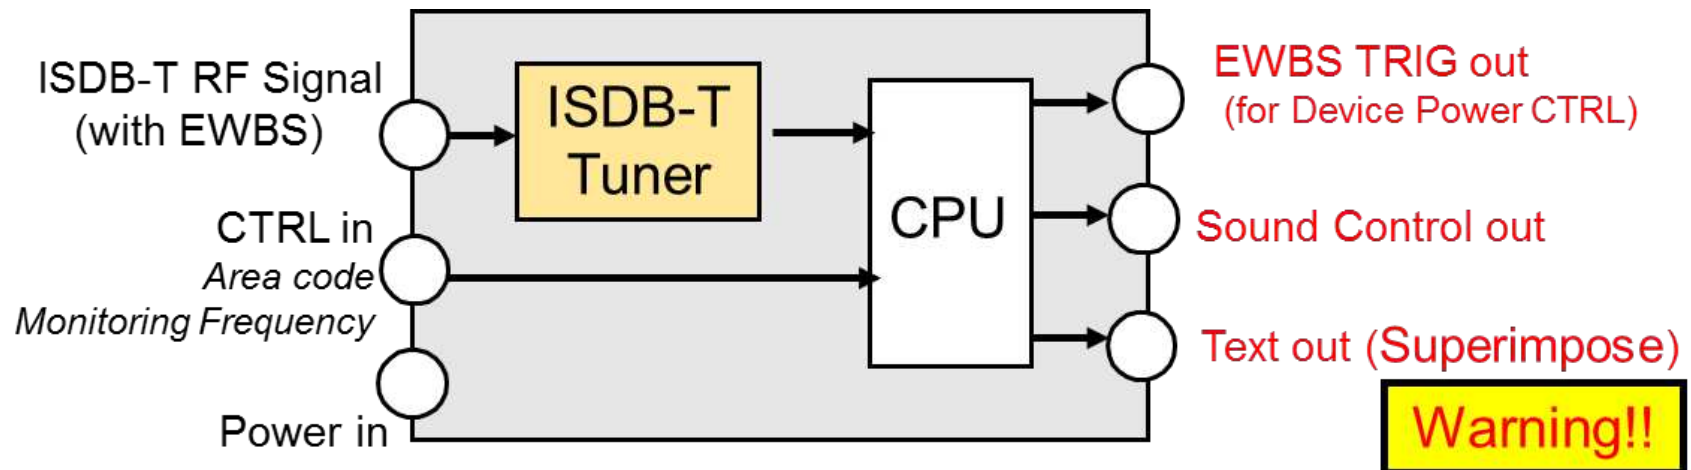

*Robust*  
*Reliable*

*Wide coverage*  
*Both for Nationwide / Local information*

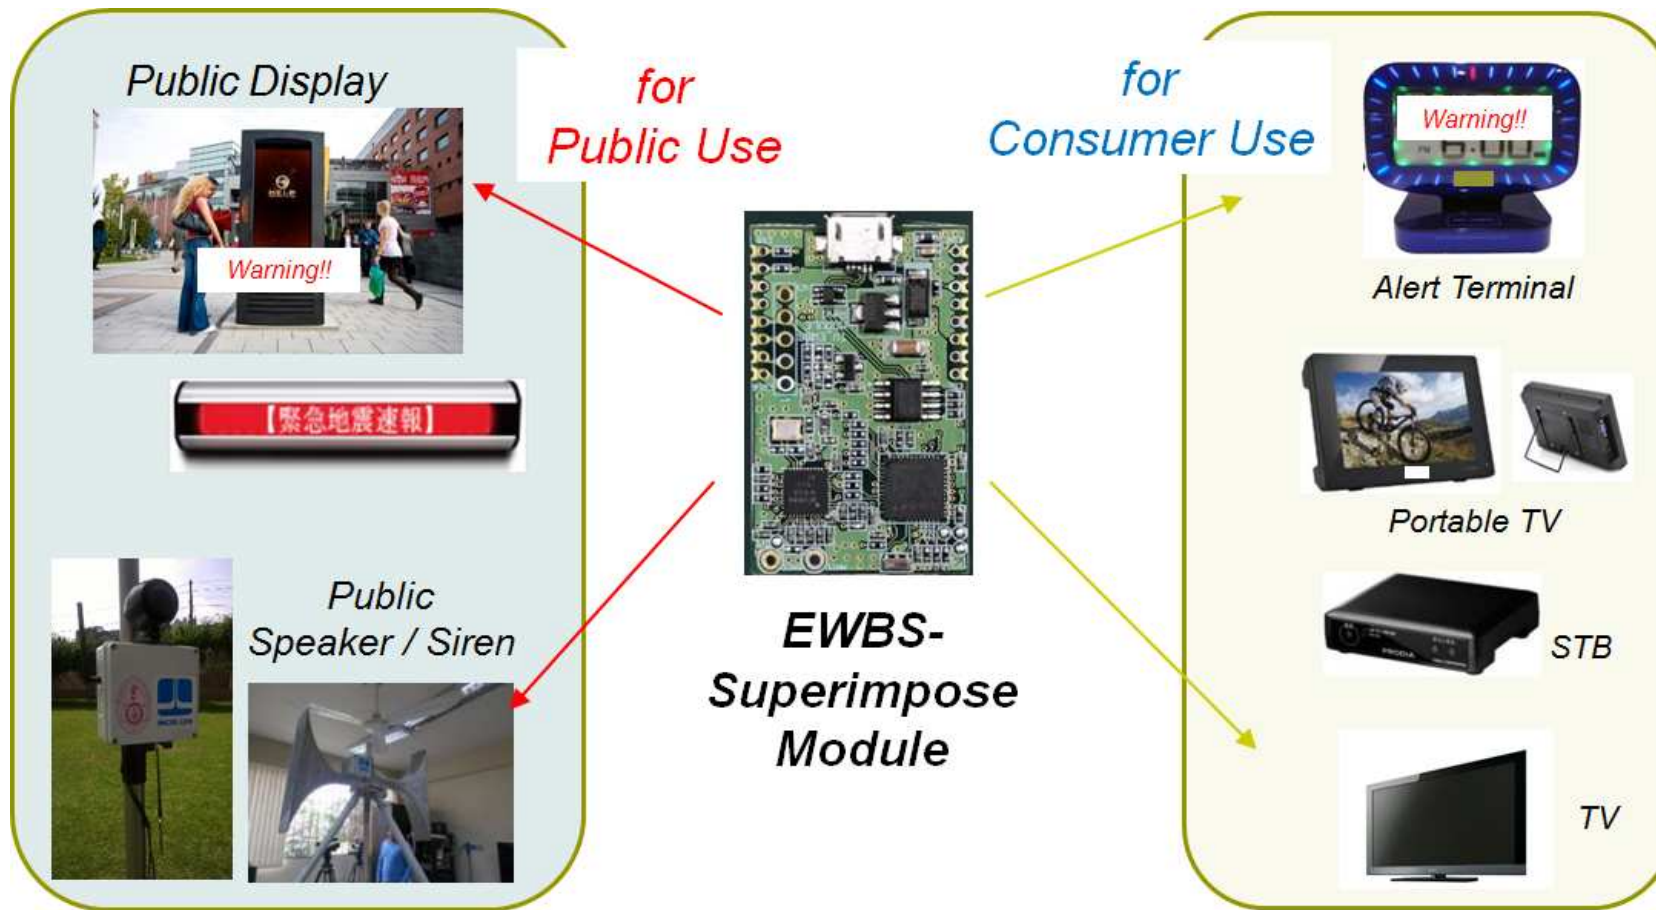

# EWBS Superimpose Module

- Exclusive reception of Text Information
- 24-hour monitoring  $\Rightarrow$  never to miss EWBS alert
- Robust “One-seg” reception
- Small size , Low consumption

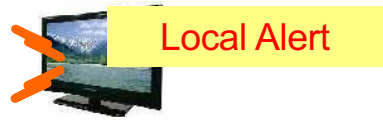

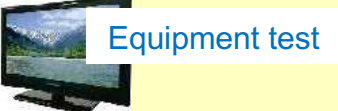

# EWBS Superimpose Module

# Application of operation controlled by EWBS Inserter

			Siren <small>for TSUNAMI</small>	Signage	TV
1	Tsunami Alert  N	Full-seg One-seg			
2	Local Alert  L	Full-seg One-seg			
3	Test for Designated receiver  L	One-seg			
4	Drill  N L	One-seg			
5	Important Notification  N L	One-seg			
6	General Information  N L	One-seg			

N: Nation wide Operation    L: Local Operation

# EWBS transmission control terminal ( operation menu )

The screenshot displays the EWBS Contorol Terminal Ver 3.00 interface. The main window is titled "EWBS Contorol Terminal Ver 3.00" and features a red header bar. The interface is divided into several sections:

- Message Registration:** A list of five messages, each with a number in a box on the left. Message 4 is highlighted in green. The messages are:
  - 1: 1st Lang: La siguiente figura muestra la red de televisión digital terrestre en el Perú. 2nd Lang: The figure below shows the digital terrestrial TV network in Peru.
  - 2: 1st Lang: ¡¡Advertencia de tsunami!! en Nationwide Peru00 2nd Lang: Tsunami Warning!! in Nationwide Peru00
  - 3: 1st Lang: Evacuation order has been issued. Test area 000. There is a danger of landslides. 2nd Lang: Evacuation order has been issued. Test area 000. There is a danger of landslides
  - 4: 1st Lang: El cóndor de los Andes despertó con la luz de un feliz amanecer. Sus alas lentamente desplegó y bajó al río azul para beber. Tras él la Tierra se cubrió de verdor, de amor y paz. 2nd Lang: In a little while from now If I'm not feeling any less sour I promise myself to treat myself And visit a nearby tower And climbing
  - 5: 1st Lang: ¡¡Advertencia de tsunami!! en Nationwide Peru00 2nd Lang: Tsunami Warning!! in Nationwide Peru00
- Delivery AREA:** A vertical panel on the right side of the message list.
- Playout Message:** A section for configuring message playback. It includes fields for "1st Lang" (spa), "2nd Lang" (eng), "8-bit\_code" (UTF-8), and a text area containing the message content in both languages. Buttons for "SAVE Message" and "Set AREA" are present.
- Status:** A section for monitoring the system. It includes a "Status Check" button, a "Message" field, a "DT" field, and an "Elapsed Time" field. The "Warning Level" is currently set to "Normal Warning".
- Playout Control:** A section for controlling the message playout. It includes a "DT(sec)" field set to "Infinite", an "Elapsed Time" field, and "START" and "STOP" buttons.
- Table:** A table at the bottom of the interface with columns: "Date and Time", "Message", "DT", "Transmission Control", and "EWBS Area-Group".

The Windows taskbar at the bottom shows the application "EWBS Contorol Termi..." and "Normal-time Superim...", along with system icons and the time "10:43".

# Conclusion

- *The EWBS in these Latin American countries presents a different operational style from Japan. For this reason, we have worked on **technical development of "EWBS Superimpose Dissemination System"** adapted to numerous local requirements.*
- *The system we have developed is being sequentially implemented and verified in Peru and other Latin American ISDB-T adopting countries, and we are continuing our **technical support and cooperation for stable and reliable system operation**.*
- *In the near future, we strongly expect that collaboration between Japan and Latin American countries will **standardize and unify the most suitable systems**, and that devices will be launched and developed in the market, leading to the permeation of EWBS, which eventually would lead to the contribution to disaster prevention and mitigation.*

# Acknowledgments

- *We would like to express high appreciation to the Ministry of Internal Affairs and Communication of Japan for its exceptional support for our activities.*
- *We would also like to thank several manufactures, which have provided us with technical support for the development of EWBS devices, “TANABIKI Inc.”, “CENTURY CORPORATION”, ”NORITAKE ITRON CORPORATION” and “MASPRO DENKOH CORP.” from Japan as well as “VideoSwitch” from Argentina.*
- *We also thank Mr. Cesar Gallegos, Peru and Mr. Frank Coloma, Costa Rica who have been working as local coordinators for these activities.*
- *We are grateful to the SBTVD-Forum, Brazil, for cooperative study as well as to all those people in Latin American ISDB-T adopting countries, who have been extending extensive understanding and cooperation to us for our activities.*
