

Anywhere, Anytime Constant LTE Connectivity

■ Private Network Anywhere

The rising demand for reliable and secure communication by numerous enterprises will help augment the private LTE market. Businesses are currently dependent on private wireless networks for communicating, controlling automated systems and collecting insights.

■ JRC Tactical LTE Box

Public safety and security forces have the difficult task of bringing order to chaos. First responders must be able to communicate during an emergency without any security threats. Those customers need independent, reliable broadband wireless solution that allows voice, video and data transmission without dependency on any commercial resources.
