

JMA-912 RAINWATCHER X-Band Polarimetric Radar with Fully Solid State Technology

RAINWATCHER is compact in size and provides high performance based on polarimetric processing and pulse compression technology.

- **High Accuracy rainfall sensor for various application in our society:**
 - River Water level Control
 - Disaster Prevention & Early Warning
 - Safety Airport / Railway Operation
 - Road Management
- **Operation/Maintenance cost drastically reduced by long life design.**
 - Easy Installation
 - Mobile Transportable Application
 - Low power Consumption
 - No Consumables
