

## Activity of disseminating Japanese EWBS technology

(Emergency Warning Broadcast System)

September 2021

#### ISDB-T 20 countries

Those countries which are facing the risk of natural disasters (Peru, Central American countries etc.) have strong interest in EWBS introduction and expect a technical assistance from Japan.

## About DiBEG

https://www.dibeg.org

#### Purpose

Digital Broadcasting Experts Group (DiBEG) was founded on September 1997 to promote ISDB-T, the Japanese Digital Terrestrial Broadcasting System, in the world. And also, DiBEG promotes the exchange of technical information and international cooperation to facilitate common understanding for ISDB-T in the world.

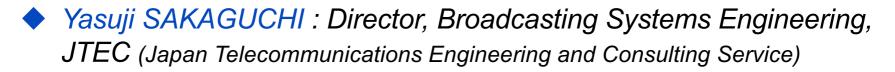

#### **Activities**

- Research of the trend toward digital broadcasting in the world.
- Exchange of digital broadcasting technologies and facilitation of common understanding.
- Technical assistance for the countries where ISDB-T has been adopted.

#### Members (17)

- ACCESS CO., LTD.
- FUJI TELEVISION NETWORK, INC.
- Hitachi Kokusai Electric Inc.
- Japan Broadcasting Corporation (NHK)
- Japan Telecommunications Engineering and Consulting Service (JTEC)
- MASPRO DENKOH CORP.
- NEC Corporation
- NHK Technologies, Inc.
- Nippon Television Network Corporation
- Panasonic Corporation
- Sharp Corporation
- Sony Corporation
- TV TOKYO Corporation
- TOKYO BROADCASTING SYSTEM, INC
- TOSHIBA CORPORATION
- TV Asahi Corporation
- YACHIYO ENGINEERING CO., LTD.

## **Authors**

- Yasuo TAKAHASHI : Advisor to DiBEG
- Seiji SAKUMA : Senior Researcher, ISDB-T Promotion Group, ARIB (Association of Radio Industries and Businesses)

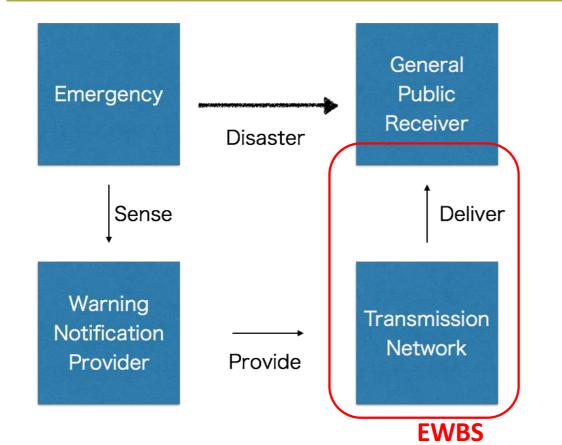

## Outline

- 1. Advantage of EWBS with ISDB-T
- 2. Technical requirements on EWBS in Latin American countries
- 3. Development of "EWBS Superimpose Dissemination System"
- 4. Current Status of EWBS Implementation in Latin American Countries

## EWBS ecosystem & requirements

- Mass delivery
- Rapidity
- Understandability
- Universality
- Usability
- Reliability

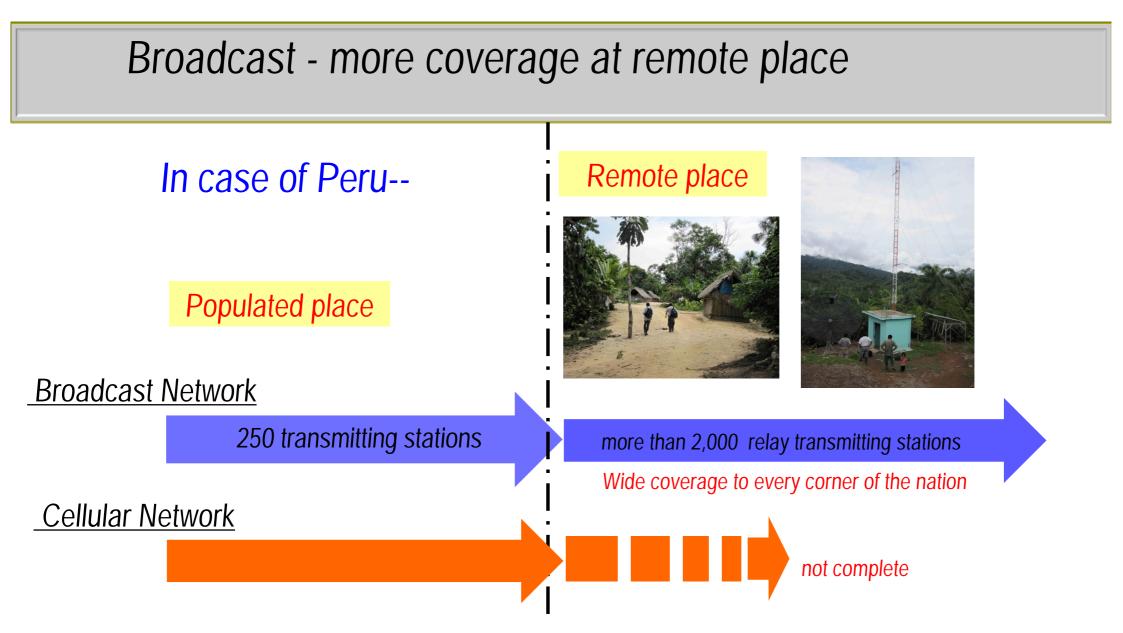

equals to "Advantage of ISDB-T"

Why emergency information on broadcast network?

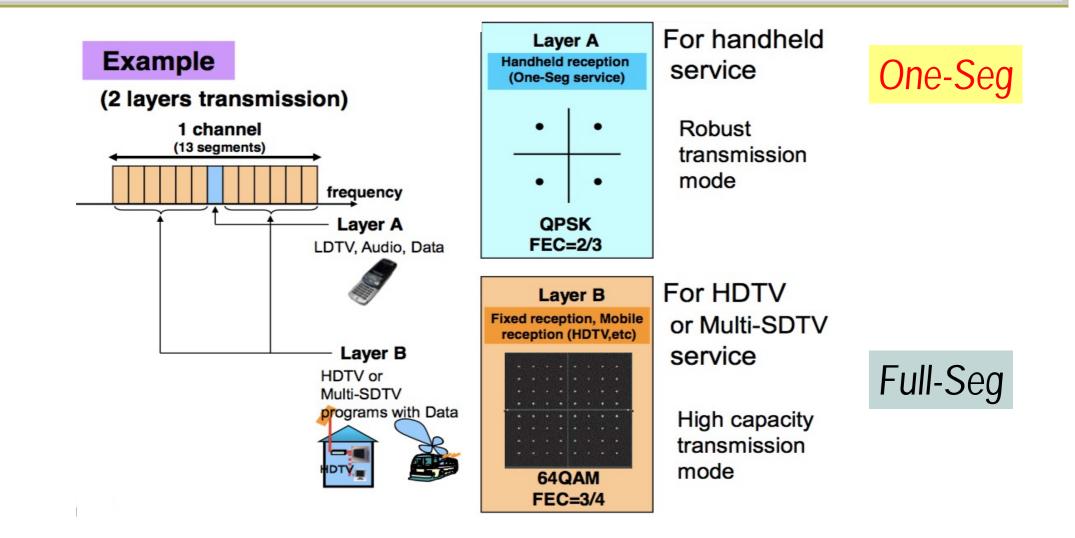

- One-way transmission Traffic Congestion-free, Resistant to cyber security
- Robust transmission
- More coverage at remote place

## **Broadcast - Robust Transmitting Station**

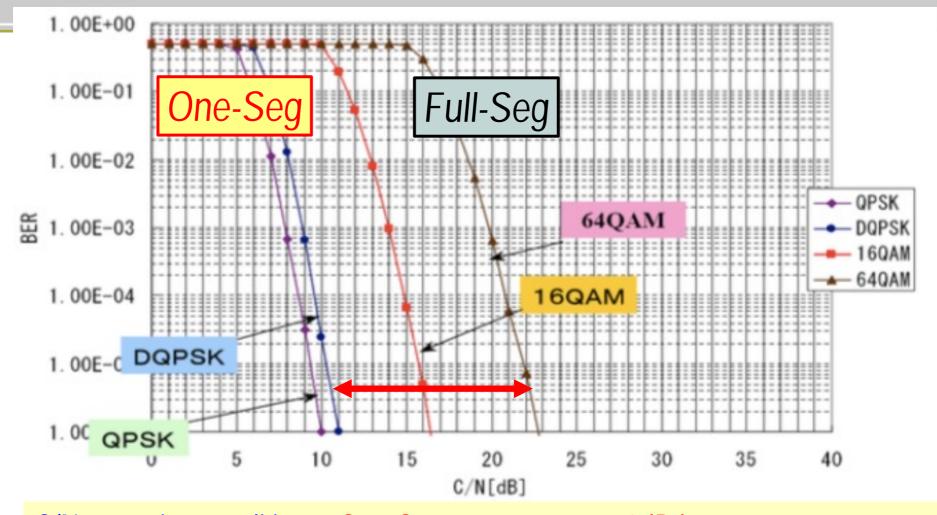

#### **ISDB-T** Hierarchical Transmission

## Robust "One-Seg" Transmission

C/N reception condition : "One-Seg" has more than 10dB better than "Full-Seg"

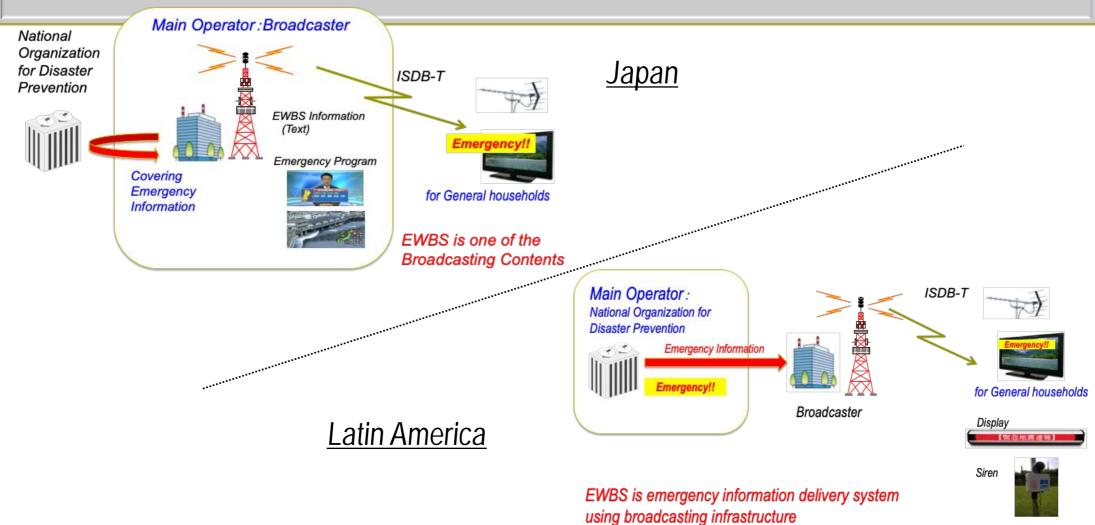

- 1. Advantage of EWBS with ISDB-T
- 2. Technical requirements on EWBS in Latin American countries
- 3. Development of "EWBS Superimpose Dissemination System"
- 4. Current Status of EWBS Implementation in Latin American Countries

#### Differences in requirements on EWBS

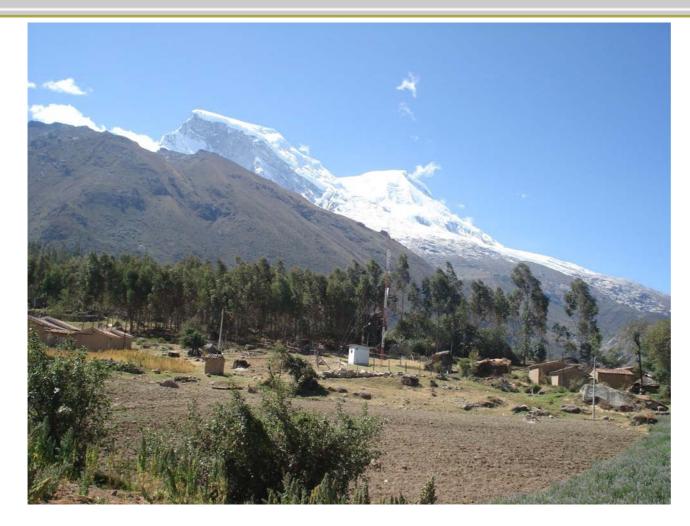

|                   | Japan                       | Latin America                                     |

#### Difference in EWBS Operation between Japan and Latin America

for Public place

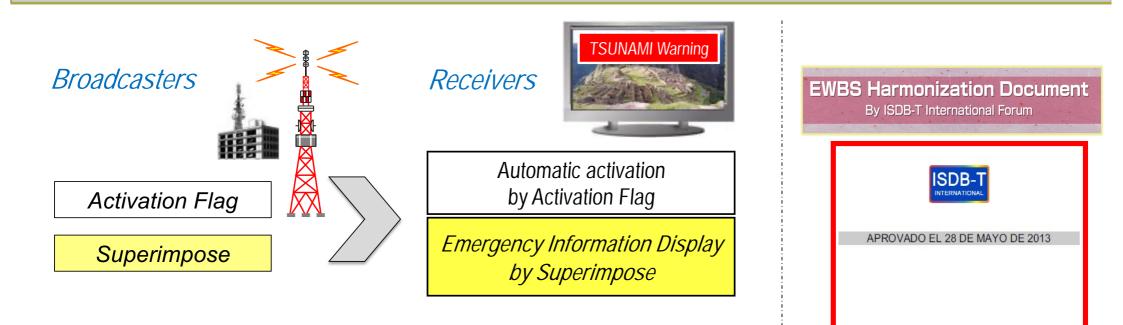

#### Requirement of EWBS local operation

At a TV Transmitting Station in Peruvian Andes. This is a district where 20,000 people died of drowning by devastating glaciers flooding caused by the 1970 earthquake.

In the future, digitization and EWBS operation will contribute to the Local specific disaster prevention.

## **EWBS Standardization in ISDB-T International Forum**

ISDB-T DOCUMENTO DE ARMONIZACIÓN

EWBS (05/ 2013)

PARTE 3: SISTEMA DE ALERTA DE EMERGENCIAS

Adding a "Superimpose" function on the Japanese original, EWBS Standard was approved by ISDB-T International Forum in May 2013

## **EWBS Standardization in ISDB-T International Forum**

|             | ARIB                                                                         | ISDB-T<br>INTERNATIONAL                              |  |  |

## What is "Superimpose" ?

- 3 Types of text messages used in TV service
  - (1) Normal Subtitle (Open Caption)
  - Information which belongs to the main program
  - > Always on the display

#### (2) Closed Caption

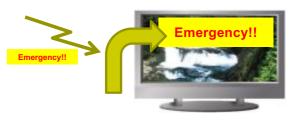

- > the service for inaudible persons / multilingual movie etc.
- Synchronous information with the main program
- Selection of display (on/off) by viewers

### (**3**) Superimpose

- > <u>Asynchronous</u> information with the main program
- Selection of display (on/off) by viewers
- to be sent background at any time

**Overlay in Broadcasting Studio** 

### **Overlay in Receivers**

## What is "Superimpose" ?

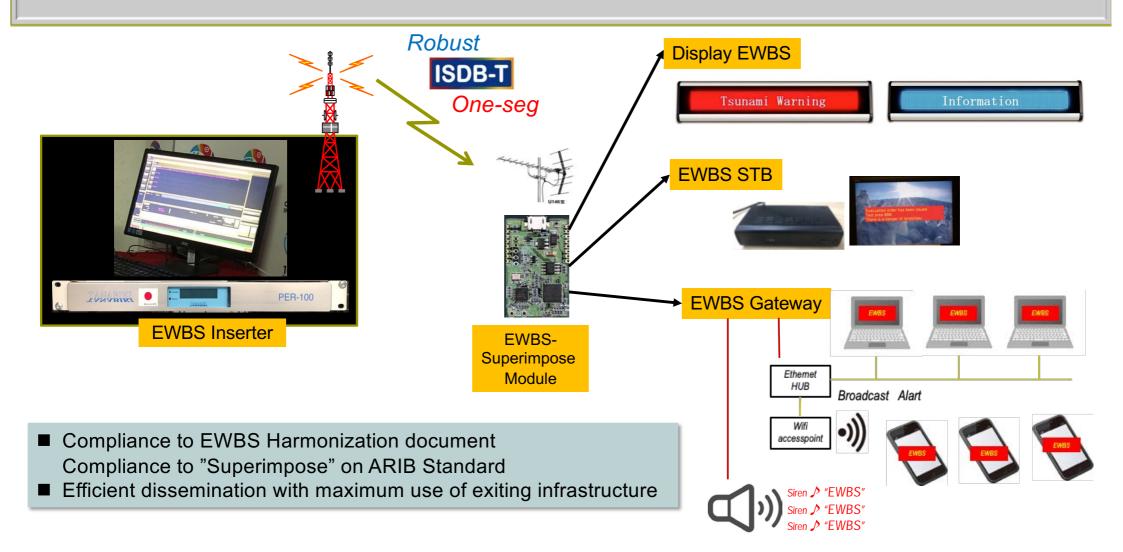

On 14:46 March 11,2011 NHK's Broadcasting

- 1. Advantage of EWBS with ISDB-T
- 2. Technical requirements on EWBS in Latin American countries
- 3. Development of "EWBS Superimpose Dissemination System" for Latin American Countries
- 4. Current Status of EWBS Implementation in Latin American Countries

#### EWBS Superimpose Dissemination System for Latin American countries

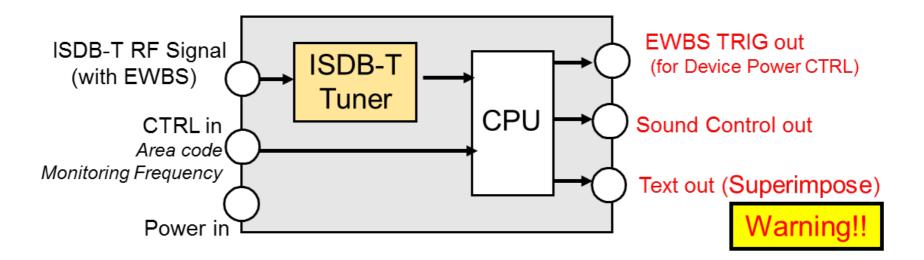

# EWBS Superimpose Dissemination System

Simple installation Robust Wide coverage Both for Nationwide / Local information Simple operation Reliable **ISDB-T** of the tsunami

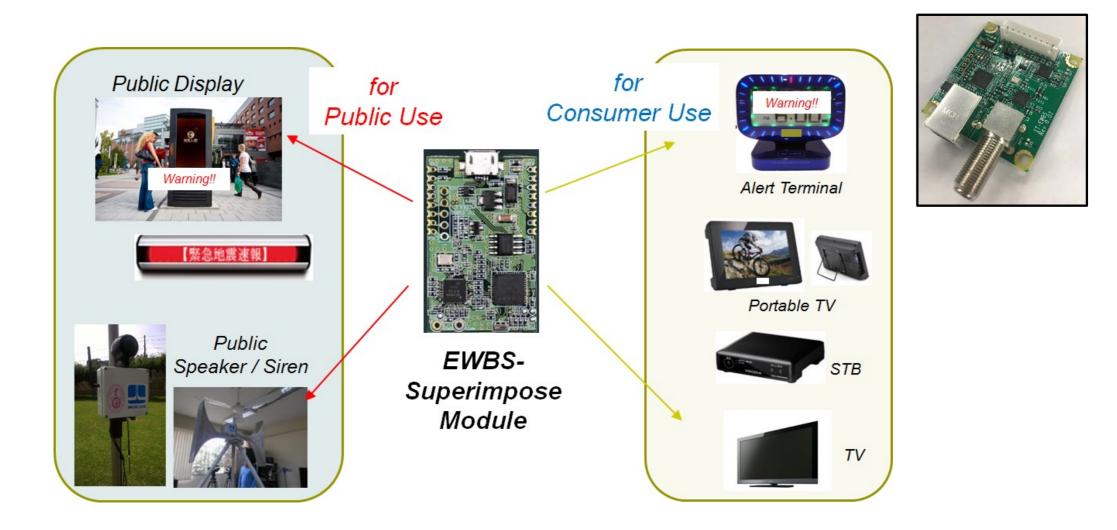

## EWBS Superimpose Module

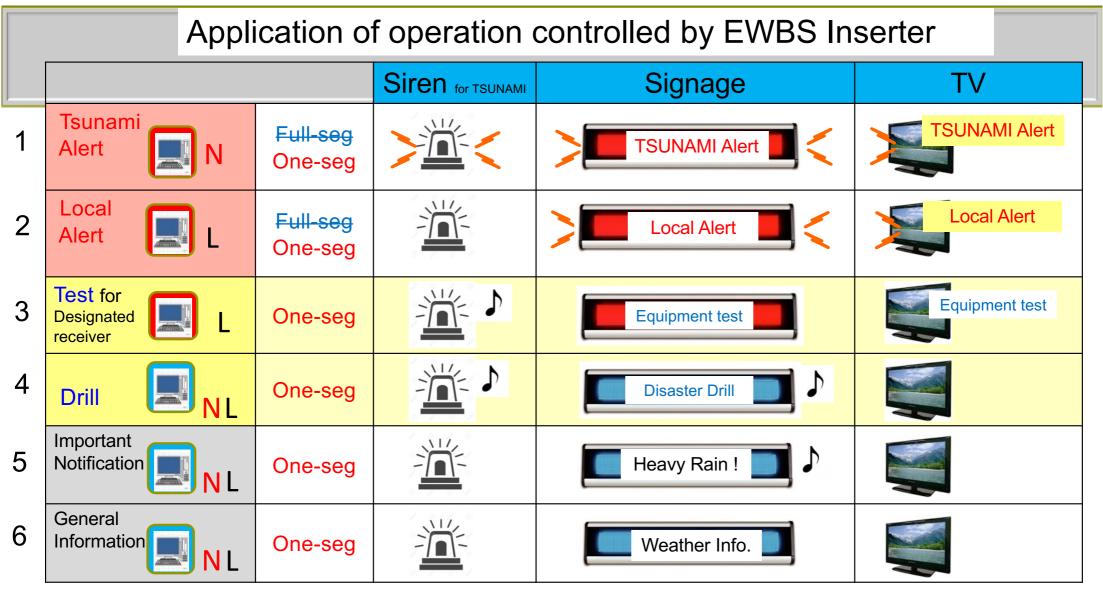

- 24-hour monitoring  $\Rightarrow$  never to miss EWBS alert
- Robust "One-seg" reception
- Small size , Low consumption

## EWBS Superimpose Module

N: Nation wide Operation L: Local Operation

#### EWBS transmission control terminal (operation menu)

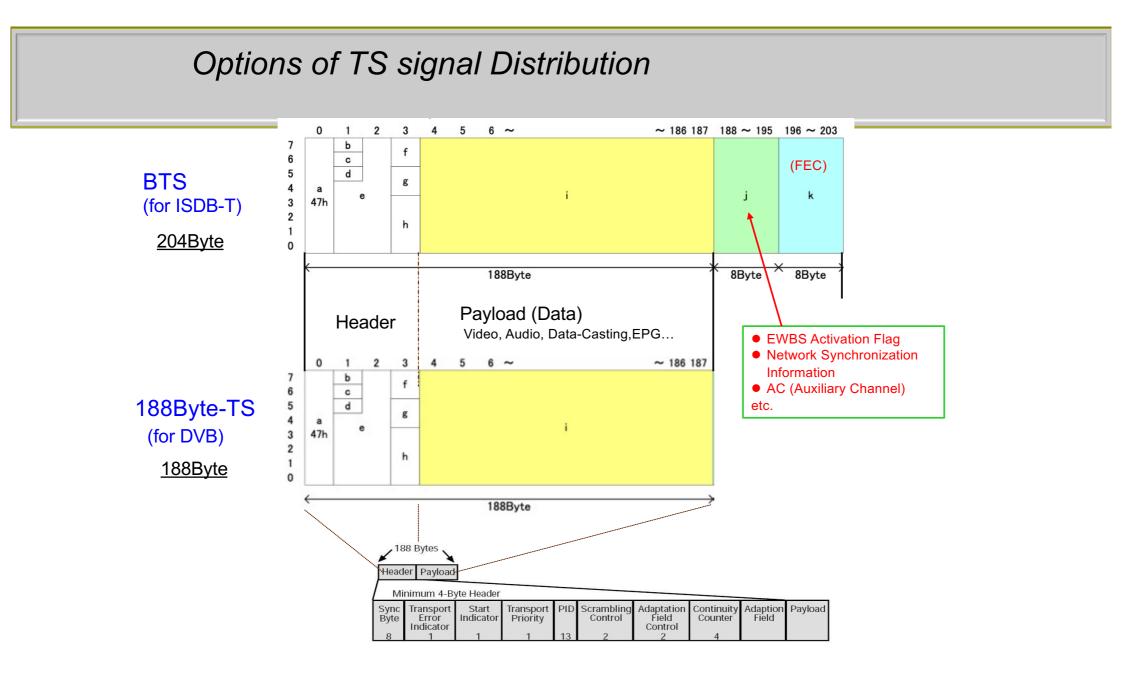

🚊 EWBS Contorol Terminal Ver 3.00

#### EWBS signal transmission system that supports DVB distribution

#### 188Byte-TS Transmission (for DVB operation)

#### EWBS Signage Display

EWBS display in operation at a radio station in Lima, Peru

- These terminals are intended to be installed in public space where people are grouped, such as government offices, fire stations, shopping centers and any other place where disaster prevention is required.
- Displays is used for the dissemination of information after the disaster ("Post-event information"). As an example of this use, the display can be installed in an evacuation center, providing daily survival information to evacuees, such as state of restoration of living conditions, volunteer activities, etc.

#### EWBS compatible Set Top Box

## Conclusion

- The EWBS in these Latin American countries presents a different operational style from Japan. For this reason, we have worked on technical development of "EWBS Superimpose Dissemination System" adapted to numerous local requirements.
- The system we have developed is being sequentially implemented and verified in Peru and other Latin American ISDB-T adopting countries, and we are continuing our technical support and cooperation for stable and reliable system operation.
- In the near future, we strongly expect that collaboration between Japan and Latin American countries will standardize and unify the most suitable systems, and that devices will be launched and developed in the market, leading to the permeation of EWBS, which eventually would lead to the contribution to disaster prevention and mitigation.

## Acknowledgments

- We would like to express high appreciation to the Ministry of Internal Affairs and Communication of Japan for its exceptional support for our activities.
- We would also like to thank several manufactures, which have provided us with technical support for the development of EWBS devices, "TANABIKI Inc.", "CENTURY CORPORATION", "NORITAKE ITRON CORPORATION" and "MASPRO DENKOH CORP." from Japan as well as "VideoSwitch" from Argentina.
- We also thank Mr. Cesar Gallegos, Peru and Mr. Frank Coloma, Costa Rica who have been working as local coordinators for these activities.
- We are grateful to the SBTVD-Forum, Brazil, for cooperative study as well as to all those people in Latin American ISDB-T adopting countries, who have been extending extensive understanding and cooperation to us for our activities.
